2009 marks the centennial for Vollmer

This year we are excited to celebrate Vollmer's 100th year in business. What started as an automated method for sharpening saw blades has evolved into a global company with machines operated in many different industries. In order to recognize the role that our customers have played in the history of the company, there will be several open house events and trade show celebrations taking place throughout the year. In addition, Vollmer is providing extra incentives to upgrade or add Vollmer PCD technology by accepting trade ins of Vollmer and non – Vollmer equipment, and offering the Vollmer Re-Assurance package. For more detailed information, contact Scott Ries, PCD Division Manager at 412-278-0655 or e-mail at ries@vollmer-us.com.

For complete details contact Vollmer Of America; 105 Broadway Ave. Carnegie, PA 15106;
